<a href="#">Unit Ranking Results</a>	Ranking of Units based on a selected Year, Quarter and Data Collection Group.
<a href="#">Risk Factor Summaries - DCG</a>	Presentation of Risk Factors for a selected Year, Quarter and Data Collection Group.
<a href="#">Risk Factor Summaries - ARG</a>	Presentation of Risk Factors for a selected Year, Quarter and Aggregate Reporting Group.
<a href="#">Risk Factor Trends - Graphs</a>	Regression line graphs are rendered based on every Risk Factor for a selected Installation, DCG or Unit. Additionally, the Army's trend line is shown on each graph for comparison.
<a href="#">Risk Factor Trends - Data</a>	Historical incident rates for a selected Installation, DCG or Unit are rendered along with the associated Army rate.
<a href="#">Shot Groups</a>	Customized graphical report based on a selected Target and Grouping entity as well as a selected Year and Quarter. Factor incident rates for the target entity are compared to those of the grouping entity and are rendered as bullet holes on a target. Additionally, Army rates may be included.
<a href="#">Installation Roll Ups</a>	Breakdown of Incidents and Rates for a desired Installation for a selected Reporting Period.
<a href="#">DCG Roll Ups</a>	Breakdown of Incidents and Rates for a desired Data Collection Group for a selected Reporting Period.
<a href="#">Brigade Roll Ups</a>	Breakdown of Incidents and Rates for a desired Brigade for a selected Reporting Period.
<a href="#">ARG Roll Ups</a>	Breakdown of Incidents and Rates for a desired Aggregate Reporting Group for a selected Reporting Period.
<a href="#">Battalion Reports...</a>	Collection of Battalion Reports including the Battalion Summary. Reports are generated based on a desired Battalion for a selected Reporting Period.
<a href="#">ACSAP Utility Reports...</a>	Collection of System reports available only to ACSAP users.

 Help

The system utilizes Data Collection Groups (DCGs), which are comprised of Brigades, Battalions, Companies, Platoons and/or Squads.

The drop down box above contains all DCGs within your scope of data visibility.

For each system risk factor, this report displays a summary of occurrences, rate averages, and rate ranges that transpired within the selected reporting period for the selected DCG and its subordinate units.

# Unit Ranking Report

The Unit Ranking Report displays unit rankings in

two ways:

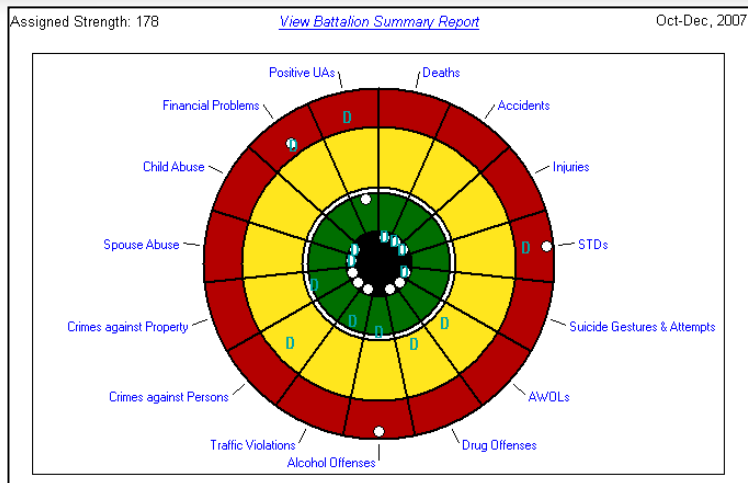

1. The left column displays units with the most risk factors in the red band area of the shot group. The units are sorted and displayed in descending order.

2. The right column displays units based on a score derived from risk factors and the total of each unit divided by RRP Army rate multiplied by 100. The units are

$$\text{Score} = \frac{\text{Sum (each unit rate)}}{6} \times \text{each RRP Army rate} \times 100$$

Displays incident data in a spreadsheet like format showing subtotals for parent level units and a grand total for the Data Collection Group.

This is a great report for data entry quality assurance because null data entries show up as asterisks. “\*”

# Trend Graph Report

Displays rates per thousands for each risk factor over a three year period, plotting every quarterly data point.

Also, shows the slope lines for the selected entity in red. This report's comparison level (displayed as a blue dotted line) will default to the RRP Army but, an upper level comparison may be chosen. (i.e. Installation, MACOM, Region)

# Trend Data Report

Displays rates per thousands for each risk factor over a three year period, showing every quarterly rate.

This report's comparison level will default to the RRP Army (shown in black) but, an upper level comparison may be chosen. (i.e. Installation, MACOM, Region)

# Shot Group Report

The Shot Group is a custom graphical report which ACSAP developed to quickly display possible high-risk areas within a selected group.

Each slice of the report displays one risk factor. The bullet hole displays the selected entity's rate per thousand soldiers as compared to the RRP Army rate per thousand soldiers. The RRP Army rate is displayed as the white section in the chart. Upper level comparison levels are also available.

The

# Summary Reports All

The Summary reports show the data that is used to generate a Shot Group Report.

The report displays strength of the group, each risk factor, number of incidents and rate per thousand soldiers per factor. Again, this report has the upper level comparison feature available. If the report was generated from a Shot Group then the comparison level will be passed and displayed.

If the incidents and rate per thousand are **displayed in red** this means the selected group and/or comparison level was greater than **twice the RRP Army rate**.

# Matrix Report

This report displays Unit risk factor incident rates (per 1,000 Soldiers) for each Unit within the selected Brigade. It also provides a comparison of Unit incident rates to those of:

- All Soldiers in the Brigade
- The Army

Installation data is displayed with a red, amber, or green background, based on incident rates. Red cells are intended to highlight potential problem areas. The legend below the report offers a definition of these background colors. Clicking on a red, amber, or green cell will bring up a trend graph displaying the selected Installation's risk factor incident rates over time.

\* Blank cells indicate no data submitted

# Matrix Report

The Matrix Report is a custom graphical report which ACSAP developed to mimic a spreadsheet. This report also helps quickly display possible high-risk areas within a selected group.

Each cell of the report displays a color and rate per thousand for one risk factor for one unit. Group comparison levels are displayed on the left after the risk factor names.

# Commanders' Package

**Commanders Package - LTC Commander Hood**

### Shot Group

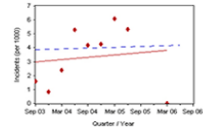

**Description:** This is a customized graphical report based on current Year and Quarter. Risk factor incident rates for the selected units are compared to those of the parent installation/DCG. Unit incident rates are displayed as bullet holes on a target. Installation/DCG rates are displayed as icons ("I", "D") on the target. The white ring between the green and amber zones represents the overall Army rates for each factor.

### Risk Factor Trends - Graphs

**Description:** Data points and regression line graphs for the selected unit are displayed for each every Risk Factor over a period of time. Additionally, the installation/DCG's trend line is shown on each graph for comparison. This will allow commanders to compare high risk behavior incidents for their units as compared to the parent installation/DCG.

# Commanders' Package

The Commanders' Package is a group of reports displayed in a quad slide format based on rights and privileges granted to a commander.

Each quadrant has a specific report chosen to deliver information quickly and efficiently with a minimum of clicking.

Commanders who become familiar with the software can still run reports via the wizards.

# R-URI Report

As part of the Deployment Cycle Support Directive ACSAP developed The Reintegration Unit Risk Inventory (R-URI).

The R-URI is a 79-item anonymous questionnaire designed to screen for high-risk behaviors and attitudes affecting unit readiness and personnel well being that may have occurred during deployment or since redeployment.

ACSAP is currently incorporating R-URI reports into the web-based Risk Reduction application.
